

EASY STEPS TO TREATMENT

1

CLEAN IT UP!

- Clean the affected area and DRY thoroughly.
- Pay special attention to spaces between the toes. Don't be in a rush to put on your shoes, let your feet air out.

2

APPLY IT THIN!

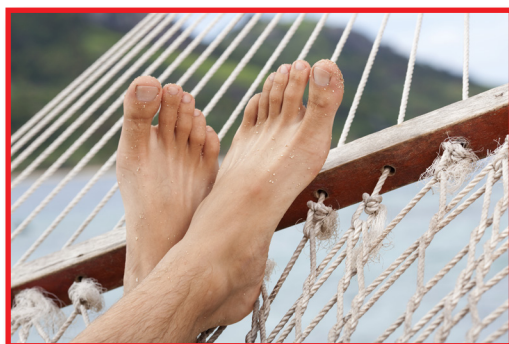

- A thin layer of Formula 7® applied over the affected area twice daily (morning and night) or as directed by a doctor will allow the product to penetrate the tissue and reach the fungal growth area.
- Apply Formula 7® regularly. Do not skip applications.

3

CHANGE IT OFTEN!

- Change your shoes and socks when your feet get wet or damp. Keep extra socks with you and change them when needed.
- Wear well fitting, ventilated shoes. Buy absorbent or special synthetic socks that wick the perspiration from your feet.

Formula 7® is Guaranteed

Formula 7® is backed by an unconditional, patient-direct, money-back guarantee, only when purchased at your doctor's office. If you are not completely satisfied, call Tetra's toll-free number on the package for a full refund.

FROM FUNGUS TO FABULOUS

For healthy looking nails & skin,
and to keep your feet looking great.

The only **all-in-one*** antifungal treatment
with cosmetic and bactericidal agents.

*Patent Pending U.S. Application # 62580689

Formula 7®

is the first paraben free antifungal microemulsion fortified with cosmetic and bactericidal agents.

What makes Formula 7® unique?

1 Formula 7® contains soluble Tolnaftate –a technology developed by The Tetra Corporation (U.S. Patent #4,810,498) and used first in Formula 3®.

2 Formula 7® is the first tolnaftate microemulsion – Patent Pending U.S. Application #62580689).

3 The cosmetic ingredients in Formula 7® rehydrate and restore the natural physical properties and appearance of the skin and nail. The cosmetic ingredients are C12-15 Alkyl Benzoate, Jojoba Seed Oil, Glycerin, PEG-20 Hydrogenated Lanolin, Urea, Vitamin E Acetate, and Caprylyl Glycol.

4 The urea in Formula 7® increases the water content of the top layer of the skin. Urea gently dissolves the intercellular matrix, which results in loosening the horny layer of the skin and shedding scaly skin at regular intervals, thereby softening hyperkeratotic areas. Urea also hydrates and gently dissolves the intercellular matrix of the nail plate, which can result in the softening and increasing permeability of the nail plate for cosmetic debridement.

5 Formula 7® contains melaleuca alternifolia (Tea Tree) oil that adds the benefit of an antifungal, antiseptic, germicidal and anti-bacterial.

6 Only Formula 7® contains N-acetyl-L-cysteine (NAC) as a penetration enhancer for tolnaftate. Clinical studies have also found the NAC has bactericidal properties and breaks down bacterial biofilms of clinically relevant pathogens including Pseudomonas aeruginosa, Staphylococcus aureus, Enterococcus faecalis, Enterobacter cloacae, Staphylococcus epidermidis, and Klebsiella pneumoniae.

7 A new 1/2 fl. oz. (15ml) tube with an integrated brush applicator for ease of use.
