

## Formula 3 Clears Up Athlete's Foot Fast, For Good!

Despite its common nature and ability to affect pretty much anyone, athlete's foot can prove stubbornly resistant to treatment.

That's where Tetra's pioneering Formula 3 Antifungal comes in.

This remarkable topical delivers swift relief and proven results when treating *tinea pedis*, making it a potent tool for any physician or practice. Keep reading to learn a little more about the product that started it all and what it can do for your patients.

### Formula 3 Antifungal: The Original

The FDA has approved the use of tolnaftate for treating and preventing athlete's foot for more than 50 years, and today, tolnaftate is used in over 70 products worldwide. These are all available over the counter or even online, but they're **suspensions of tolnaftate**.

Formula 3, however, was the first of our products to break that mold:

- As an in-solution product, **Formula 3 features Tetra's patented technology for utilizing all-natural jojoba oil** as a vehicle for tolnaftate.
- It's the **first ever option** to feature **zero separation** between the tolnaftate and the vehicle carrying it, allowing **direct delivery and quick absorption** at levels previously unheard of!
- Formula 3 Antifungal **has received the American Podiatric Medical Association's seal of approval**, so patients will feel confident using it and trust its effectiveness.
- **A bottle lasts three to six months**, offering exceptional overall value.
- Patients should be instructed to **use it after showering for optimal absorption**.

Our confidence in Formula 3 led us to create **the first unconditional, patient-direct, money-back guarantee offered in the pharmaceutical industry**.

Just one more way that Tetra works to make things easier for medical professionals!

The Tetra Corporation has been creating pioneering healthcare products for over three decades, helping physicians add value to their practices while improving patient outcomes. As a trusted provider of efficient and reliable treatments dispensed exclusively through medical doctors, we add both value and innovative treatment options to any practice we work with.
