

A 3-Step Protocol for Hyperhidrosis & Bromhidrosis: The Tetra Solution

Summer heat means sweaty feet. As more patients visit your office with complaints of excessive sweating (**hyperhidrosis**) and persistent **foot odor** (**bromhidrosis**), it's important to remember that these conditions create an environment conducive to both maceration and fungal infections.

Unfortunately, most treatments target *symptoms*, leaving the environment that *causes* symptoms unchanged.

The Tetra Corporation is here to help! Read on for tips on combining **NeverWet® Astringent Spray**, **Rapid MicroGel®**, and **Clean Sweep® Antimicrobial Shoe Shield** into a 3-part answer for summer sweat.

Step 1: Control Perspiration

The Product:

NeverWet® Astringent Spray

The Action:

NeverWet® addresses the root cause of moisture – excessive sweating.

- As a powerful astringent, it **reduces perspiration and wetness** on the feet.
- By controlling hyperhidrosis at the source, you help keep the skin drier, healthier, and less susceptible to fungal and bacterial growth.
- It's the essential **first step** in managing bromhidrosis!

Step 2: Treat & Protect the Skin

The Product:

Rapid MicroGel®

The Action:

Excess moisture often leads to macerated tissue between the toes, creating the perfect entry point for fungus.

- Rapid MicroGel® is formulated to address this.
- This **alcohol-free** microgel contains **Tolnaftate 1%** and is designed to resolve fungal infections while being gentle on sensitive, macerated skin, all without the stinging effect of alcohol-based gels.

Step 3: Sanitize the Shoe Environment

The Product:

Clean Sweep® Antimicrobial Shoe Shield®

The Action:

Treating the environment feet inhabit, not just the feet themselves.

- Shoes harbor odor-causing bacteria and fungus, leading to a cycle of re-infection.
- Clean Sweep® **eliminates 99.9% of odor-causing bacteria and fungus on contact**, creating an antimicrobial barrier inside the shoe. It **breaks the cycle** and provides lasting freshness!

A Comprehensive Approach for Better Outcomes

Fend off the frustration of recurring issues and give your patients a solution that lasts! This combination of products can:

- ✓ **Manage** the cause of wetness (NeverWet®)
- ✓ **Treat** resulting skin conditions (Rapid MicroGel®).
- ✓ **Prevent** recurrence from the environment (Clean Sweep®).

Higher patient satisfaction and better clinical outcomes are just around the corner! For more information on how to dispense this 3-part solution from your office, get in touch with us today.

The Tetra Corporation has been creating pioneering healthcare products for over three decades, helping physicians add value to their practices while improving patient outcomes. As a trusted provider of efficient and reliable treatments dispensed exclusively through medical doctors, we add both value and innovative treatment options to any practice we work with.
